The Horse Sale March 13th

The tenth annual sale of Horses will be held on the Exhibition Grounds, Lacombe, on Wednesday, March 13, and a large entry is expected. All entries should be in the hands of the Secretary, Mr. Jesse Fraser, on or before February 23rd, so that prospective buyers at a distance may have information as to the number of animals offered. It will pay better than ever this year to get your horses in good shape for the sale ring.

For some months past carloads of horses have been sent to the eastern markets from Alberta and as the season advances the demand is improving.

The real trouble is there is a scarcity of horses in the west owing to the fact that a number of breeders and farmers have not been raising as many during the recent lean years when prices were low and, in some instances, suitable stallions were not available at prices the horseowners thought they could pay.

Now there is the market and the work horses which are required for the eastern farms cannot be picked up nearly as easily as they could a few years ago.

Everything points to lively bidding at the auction planned this Spring.

Recent loads of medium weight broke work horses have been sent from the southern part of the province which have been bought at prices ranging from \$50 to \$65.

Some other shipments, that did not have as much weight or quality have gone from various parts of the province from \$35 a head up.

BAPTIST CHURCH

Special Junior Service Sunday evening at 7:30. The Juniors will sing selections, and Rev. Isler will tell the following stories.

"Barry, the heroic St. Bernard dog," "The Man Who Did Not Run Away From Dirt," a missionary story.

"The Adventures of a Slave Boy," the 14th of the Series on Gehena, "Good for Evil," a big object lesson in the place of the Sermon.

Parents as well as Juniors will find this type of Service not only interesting but instructive. Storytelling is one of the best of methods in teaching religion to boys and girls, and who does not like stories? Sunday School at 11. B. S. Cameron, Supt.

Junior B.Y.P.U. at 6:15. Miss Phillis Lee, Director.

Senior B.Y.P.U. Monday at 2. Miss Helen Cameron, President. Group A in charge.

Always a cordial invitation.

MacKenzie Bros., made another heavy shipment of hogs and cattle from the west country this week.

PRIME MINISTER IS MAN OF COURAGE

Mr. Bennett took occasion in his address to the Toronto Board of Trade this week to reiterate his well-known views on the subject of national recovery. He is still firmly convinced that neither Canadian conditions nor Canadian temperament call for the introduction of spectacular policies along the lines being tried out south of the border. He believes that it is only through thrift and hard work that the people of the Dominion will again reach that stage of economic restoration earnestly desired by all. He refuses to pin his faith to palliatives and expedients as adequate substitutes for well-tried principles and proven economic laws.

It is not an easy course for a man in public life these days to refrain from throwing out grandiose promises as bait and to inspire hopes of early recovery which cannot be realized. It would be the more popular course to promulgate huge spending policies which would appeal to the imagination of a discontented electorate, but the prime minister is a man of courage and vision and follows the gleam as he sees it. He is not playing to the gallery. In view of the striking Roosevelt programme, it is difficult for a Canadian statesman to retain his balance and stick by principles which he regards as fundamental.

There are a great many people in Canada who believe in the policies of Mr. Bennett and that in the long run they will prove of incalculable benefit to this country. There are others who are not backward in criticism, and even abuse. Many have listened to the counsel of extremists who are offering the worst possible advice from the standpoint of national good, and others are vacillating in their summing up of the present federal leadership.

However no one can deny a deserved tribute to the man who is sincere in the conviction that he is giving the country the best possible guidance in years of world-wide stress. Mr. Bennett is no trimmer in a time of economic adversity. He believes his chief duty is to conserve the credit of the Dominion and he values above all else as a restorative for national prosperity the widespread practice of the ancient virtues of industry, thrift, patience and self-denial. History may accord to him that full measure of justification which so many of his countrymen today deny him. Calgary Herald

THE CARNIVAL

The skating carnival held in the Arena on Wednesday evening was a very successful affair, well attended with good entries in the contests. Prize winners follow: Races, Boys 12 and under, Reggie Wilkes; Girls, Doris Danner; 15 and under, Boys, H. Farrell; Girls, Doris Danner; Couples, open, Louise Todd and C. Perkins; Ladies' open, Louise Todd; Men's open, C. Allison; Ladies' Fancy, Miss M. Morrison; Ladies' Comic, Miss Babe Chisholm; Gent's Fancy, Cal. Fairbanks; Gent's Comic, S. Wilson; Girl's fancy, Doris Danner; Girl's comic, Betty Jackson; and Kay Hay; Boy's fancy, Bob Chapman; Boy's comic, Bert Craig.

A talk and discussion on the Douglas system of social credit will be held in Central School House, 3 miles straight East of Lacombe on Sunday evening, Feb. 20th at 8:30 p.m. under the auspices of Lakeland U.F.A. Local speaker, Mr. Ansley.

ANTIQUES, ARTS & HANDICRAFT EXHIBIT

Plans are being made for exhibit of Heirlooms and handicraft of every sort on the afternoon of Friday, March 2nd.

This will be under the patronage of the Lacombe and District Board of Trade, and the Church Hall is available for the occasion.

The Committee is anxious to make a grand get-together social afternoon of visiting, comparing work and exchanging ideas.

The following ladies will be dressed in old-fashioned costumes and will act as hostesses: Mrs. Jones, Mrs. Misener, Mrs. Ogilvie, Mrs. O. H. Walker, Mrs. F. H. Reed, and Mrs. Henry Thame.

In the district there are some wonderful rugs from different countries, and some interesting ones made locally. Mr. Alan McDonald has consented to loan some of his choice Oriental Rugs, and will be prepared to tell those interested something about them.

There are some beautiful rugs from Prince Edward Island in the district, Mrs. MacDowell, Mrs. Pillman and Mrs. Ramsay having some very fine samples. Mrs. Stahl has a lovely rug designed by her husband and hooked from yarns unravelled from old sweaters. Mrs. Parker and Mrs. Jesse Fraser have some done by Mrs. John Fraser from Dyed Sheep's wool. Mrs. W. J. Clarke has done some beautiful hand-knotted wool rugs, and she may be persuaded to demonstrate the work at the exhibit.

The younger women are becoming very enthusiastic over hand made rugs. Mrs. Locke, Dorothy Parker and Margaret Morrison have taken up the work quite successfully. One of them will do some of that work during the afternoon. Mrs. Harry Tears does lovely rag rugs, and this work too may be demonstrated. In Mrs. E. H. Reed has a number of very interesting antiques which she will show, and Miss Osborne will loan some beautiful etchings done by her brother, who is, by the way, a Royal Academician of London, England.

Mrs. Fred Butcher is one of the District's famous quilters. She, Mrs. Fred Ramsay, Mrs. Thos. Alexander, Mrs. Bert Butcher, Mrs. Fred Stewart and others may have a quilting bee right there.

The Gilmour families have some wonderful old things, among them a picture done in different stitches and colors worked by the late Mr. David Gilmour's mother. There is also Petit-point and Bead-work in that group which will prove interesting.

Mrs. Jones has samplers dated 1834. Mrs. Price and Mrs. Harry Brown have hand woven table cloths, and Mrs. Morrison has a finely quilted hand woven spread. All these are well over the century old. Of beautiful embroideries and needlework there is a great deal around the country, and those ladies who own anything that might be of interest are asked to co-operate in this community effort and help make it a success.

Anyone having suggestions to offer for further improvement of these plans is asked to see or phone Mrs. W. N. Morrison, who is convening the affair.

Next Week's paper will have more detailed announcements of interesting features of the exhibit.

The Annual Meeting and Election of officers of the Lost We Forget Club will be held at the home of Mrs. W. P. Puffer, Day Street, on Wednesday, February 21st at 8 p.m.

Hockeyists Are Showing Fine Form

Showing championship form, Lacombe stepped away from Red Deer's last outfit Tuesday night to win the first game in the second round of the Intermediate Playdowns 4 to 3. Our boys played exceptionally fine hockey, and although they netted only 4 goals they missed several golden opportunities to score. Those who witnessed Tuesday's game were loud in their praise of our team, as they certainly looked like fitting contenders for Provincial honors.

Red Deer got the first goal when Wray and Scotty Lee got in close on Jenner and sent in a hard one. Their triumph was short lived, however, for Stan Wilson broke through the Red Deer defence and scored a neat goal. The Red Deer goalie tried to stop this shot with his hand, but the shot was too hard and glanced from his mitt into the net. The first period ended 1 to 1.

Ainsworth and Waldenberg combined to open the scoring in the second frame. Penman followed shortly afterwards with a nice unassisted goal. This tied the score again. Lee and Waldenberg combined to put Red Deer one up, but their lead was again quickly overcome when Brooks scored on a pass from Penman. The second period ended 3 to 3.

Putting everything they had into the game, Lacombe entered the last period with a determination to win. After about ten minutes of re-sawing Penman got the break that decided the game. Red Deer was forcing the play around the Lacombe net while our team was short handed. Penman picked up a loose puck, and skating fast, beat the Red Deer team back to their net and drove in a hard shot that completely baffled the Red Deer goalie. From this time to the end of the game, Lacombe played a "time-killing" game, shooting the puck the length of the rink amid the "boos" of the Red Deer fans.

It was a hard game for Red Deer to lose, and a real pleasure for the locals to win. If the Lacombe boys play the same brand of hockey that they did Tuesday night, they are almost certain to eliminate Red Deer from the playoffs here on Friday night.

H. S. Hodgins of Olds refereed. Fans should not miss Friday night's game—it will be speedy, and close. Turn out and boost for the boys.

Winning the two game series in the first round of the Provincial Playoffs from Innisfail by a score of 10 to 8 Lacombe goes into the second round Friday night against Red Deer. Innisfail took a 5 to 4 victory here Saturday night, but Lacombe's previous 6 to 3 triumph gave the locals the round 10 to 8. Saturday's game was rough and several players were injured.

Thomson netted the first counter for Innisfail, breaking away while Lacombe was forcing the play near Innisfail's net, he beat our forwards and defence and got a nice one past our goalie. Penman and McCaugherty combined for Lacombe's first goal. McCaugherty taking the pass and slapping the puck in, tying the count.

Two goals were made in the second frame, one for each side, Thompson again scoring for Innisfail and Brooks scoring for Lacombe. Percy opened the scoring in the last period on a nice solo rush and

a tricky shot, but Brooks equalized soon afterwards on a pass from Carruthers. Wilson then took a pass from McCaugherty, putting Lacombe one up. Smith got one past our goalie, which was followed by a goal by Thompson, putting Innisfail ahead at the finish of the game.

YOUTH IS KILLED

BY PAPER WAD
Vegreville, Feb. 12.—Andrew Tereasio, 18 of Two Hills, died in hospital here Monday, the victim of a gun-shot wound which, it is alleged was received during the staging of a dramatic play in the Plain Lake community hall on Saturday. No charges have been laid.

The accident occurred Saturday night when Tereasio was shot in the abdomen. It is claimed that in place of the usual blank cartridge, a cartridge from which the lead bullet had been removed, was used and the wadded paper packing, holding the powder in place, penetrated the abdomen. A shotgun was used.

The audience was horrified to see the youth collapse on the stage. He was rushed to Vegreville for medical attention.

O.S.A. EXPERIMENTAL UNION

1934

The Olds School of Agriculture Experimental Union again has available for distribution to its members some excellent seeds and plants of field and garden crops. These are listed below. Each member may make from one to four selections.

Anyone interested may become a member of the Experimental Union by paying an annual membership fee of fifty cents. Members of O.S.A. Alumni Association are eligible to make selections without fees.

POTATOES: (4 pound samples)

1. Early Ohio. 2. Netted Gem. 3. Bovee. 4. Irish Cobbler.

GRASSES

5. Westerworth Rye Grass, 1 pound. (a promising annual hay grass).

6. Pyra Western Rye Grass, 1 pound (an improved hay strain).

7. Grazier Western Rye Grass, 1 pound.

8. "Fairway" Crested Wheat Grass, 1 pound (an improved strain of this new grass).

9. Collection of Alberta grown vegetable seeds.

10. Collection of home grown flower seeds.

11. Collection of perennial flower seeds. (4).

12. Caragana Seedlings, (50).

13. Tartarian Honeysuckle seedlings, (6).

14. Caragana seed, (2 oz.).

We have limited amounts of seed of a number of the leading varieties of wheat, oats, barley and peas, but nothing strikingly new. Members who are interested are asked to write. Only a limited supply of each class of material is available so some substitution may be necessary. No orders will be accepted after April 15th.

Membership fee of fifty cents, must accompany selection. Express or postal charges amount to approximately fifty cents, this may be sent at the same time. Report Forms must be filled in and returned to the O.S.A. at the end of the growing season.

REBEKAH AND ODDFELLOWS

WILL HOLD NOVELTY DANCE

Come to the Rebekah's and Odd Fellows' Novelty Dance on Tuesday night, Feb. 20. Admission 50c. each. Come and have a good time. Lunch will be served.

PUBLIC LIBRARY

For use of the Public who desire good literature on all phases of Child Feeding, Training, etc., the Women's Institute have placed on the shelves of the Public Library the following books:

The Nervous Child, by Hector C. Cameron; The Normal Child, by Allen Brown, M.D. Growing Up, a book on Sex Hygiene, by Carl de Schweinitz; The Parents Magazine. The information contained in these books will help solve many of the knotty problems which are a daily feature of child rearing, and it is hoped that parents will take advantage of this opportunity. The cost is only 25c. a year—not more than the price of one magazine.

THE PARTY AS A WHOLE

Political observers will have noticed by this time that a subtle change has taken place in the Government at Ottawa. Individual members are starting to make radical suggestions, most of them with a Socialistic flavor. Speeches are being heard from the Government benches which create the impression that there has been a Great Awakening on that side of the House.

The Hon. H. H. Stevens, Minister of Trade and Commerce, has suddenly become aware of the possibility that unpleasant conditions exist as a result of cut-throat competition, monopolies, mass buying and the machinations of big business generally. Mr. James T. Stitt, a Manitoba Conservative, has lent enthusiastic verbal support to Mr. George Coote, C.C.F. financial critic and ardent monetary reformer, and has challenged the Divine Right of Money and the principle of "deflation without victory."

This is very, very gratifying, and we congratulate these Government members upon their new found freedom of expression. We hope they keep up the good work.

However, let us not forget that as Tiny Tim's mother pointed out, ribbons make a brave show for two pence. We do not question the sincerity of these Government members whose voices are crying in the wilderness of orthodoxy, but we do urge upon the anxious electorate (who are beginning to pluck at political straw) that a general election is approaching.

A party is not necessarily the party to vote for because a few of its members show initiative and courage before the election. The effect of a few isolated speeches advocating reform is sometimes to create a false impression of a party as a whole.

When Mr. Bennett goes to the country, the people of Canada must judge the acceptability not of a few independent souls, but of the massed ranks of Government supporters, who during the Conservative tenure of power have shown a certain sheep-like quality, and who have certainly not lifted voices of protest. They, and not the individual orators, determine the policies of the party.

And, as long as the party system persists, a party must be judged by the reforms it is willing to undertake, and not by the words which float upwards and are lost in the dim recesses of the Ottawa House of Commons. Calgary Albertan

Mr. A. Belcher Leaving Town

The news that Mr. A. Belcher, manager of the Bank of Montreal here, was being transferred to the Charlottetown, P.E.I., branch of that institution, was this week received with great regret by his host of friends in town and district. For many years, almost since the town's advent, Mr. Belcher has been closely identified with its progress. Coming here as a Junior in the days of the old Merchant's Bank, he rose to become manager of that bank's branch, and continued in that position when the Merchant's was absorbed by the Bank of Montreal. He has acted in that capacity in several Alberta cities, Edmonton, Medicine Hat and other places, and eventually returned to Lacombe, where he has been in charge for the past eight years. Mr. Belcher has always taken a deep interest in affairs of the town and district, and has rendered great assistance to the various organizations, being on the boards of the Agricultural Society, Board of Trade, Golf Club, Curling Club, and he will be greatly missed by these organizations. Without his genial presence on our streets, the old town will not seem quite the same, and while we all regret the removal of "Art" and his estimable family to the "effete east," congratulations on his promotion, and best wishes for success and happiness will go with him.

WEEKLY NEWS LETTER

From (Lacombe Experimental Station)

Feeding the Orphan Litter

Almost every pig breeder has occasion to bring some pigs up on the bottle; the usual experience is that the pigs do not take to the bottle and the milk does not agree with them, because of the difference in composition of sow's and cow's milk. A carefully worked out, modified milk formula that has been successfully used at the Dominion Experimental Station, Lacombe, is made up of

1 lb. cow's milk.
1 lb. lime water.
1/4 lb. Separator cream.
1/4 lb. Sugar.

These should be mixed in a clean vessel and the pigs from 1 to 10 days old should be given about 1/4 pound each divided into five feedings over a 24 hour period. The young pigs should not gain in weight for the first ten days, and if they can be kept in a healthy condition for that time there will be far less danger of losing them later. When the pigs are over ten days old, the amounts of sugar, cream and lime water should be gradually reduced, until at the age of three weeks straight cows milk may be safely fed.

Before the pigs have learned to drink, the thumb of an old kid glove, pierced at the tip, securely fastened on to the neck of an ordinary bottle, will greatly simplify feeding. Special care should be taken to thoroughly sterilize every vessel used in feeding the pigs.

The birds are building their nests in the trees; the gophers are frolicking through the fields; the trees are commencing to bud; the snow is almost gone. On Sunday the thermometer registered 80 in the sun. We do not like to predict that Spring is on us, as before the paper comes out a Chinook may come out of the north and queer our guess. But here's hoping.

WORLD HAPPENINGS
BRIEFLY TOLD

The tendency to glorify war in the school text books was denounced by Dr. Terence W. L. McDermott, secretary of the League of Nations Society, Toronto.

"Sunshine Inn", free dining room in Victoria, B.C., celebrated its second birthday on January 4 with a record of 200,000 meals served to the needy.

The "Life of Our Lord", which Charles Dickens wrote for his children, may be published after all. An offer of \$50,000 was reported to have been made for the book.

Claimed to be the fastest war vessel afloat, a new type of torpedo craft, capable of a speed of 55 knots, is under trial at Saint-Nazaire, France.

British Columbia beef cattle growers have gone on record as favoring a national marketing board. It has been announced by J. A. Grant, provincial commissioner.

Churchill's first public "stopping place" will be erected at the northern airport next spring. Harry Olenky, northern pioneer and hotelman, announced he received a permit from the Manitoba government for the Churchill structure.

Described as one of the most valuable historic relics discovered in the northwest, a medalion left by Capt. James Cook, Pacific northwest and Antipodes explorer, when he landed at Nootka, Vancouver Island, 1778, has been found.

Completion by the government of Canada of a special chamber at the port of London for use in the handling of Canadian chilled and frozen meat products was announced by Hon. H. H. Stevens, minister of trade and commerce.

British Columbia's agricultural products, despite disastrously low prices, were worth \$34,466,000 in 1933, a slight gain over the 1932 figure of \$34,373,923, according to a year-end estimate, released by Hon. K. C. MacDonald, minister of agriculture.

Lewis Luker, pioneer Canadian railroad builder, is dead at Toronto at the age of 80 years. He was associated with Mackenzie and Mann in construction of the Canadian Pacific railway through the Rockies and in completing the Canadian Northern railway.

The success of the League of Nations depended on the development in each country of strong movements that would support the ideal of international co-operation. Hon. Ernest Lapointe, president of the League of Nations Society in Canada, said in an address at Ottawa.

Too Hard On Roadbed

Speedy Trains Are Not Put Into Regular Service

A train which travels so quickly that its high speed is still in advance of practical use is an anomaly, but Germany possesses it today in its electrical "Flying Hamburger", and it is of interest to note that thirty years ago speeds unequalled in the world were achieved by electrical trains built by English electric companies. On September 15, 1903, a speed of 125.88 miles an hour was reached, and this was increased on October 27 to 130.66 miles. Technical difficulties, especially connected with the roadbed, were responsible for the fact that these trains were not put into regular service. There was also no popular demand at that time for such rapid travel. The record of 142.9 miles made by the "Zemplitz" on rails two years ago still stands unchallenged as the world's record for travel on rails, but the speed is too high for practical use.

Could Prevent War

Blumenfeld States Britain And United States Have Power

Ralph D. Blumenfeld, chairman and editor of the London Express, says with some force that talk of war in Europe is "bunk" and that Britain and United States, "standing shoulder to shoulder," could prevent any war from starting. It is true. If the British Empire and the United States who held the bag and paid the bills in the late nineteenth century were to refuse to come into another one, physically or financially, no nation in Europe would fight. Vancouver Sun.

Needed Some Rest

"Boy, old man, do you mind lending me your radio tonight?" asked Brown of his neighbor. "Certainly, old chap, with pleasure," replied Jones. "Are you giving a party?" "No," answered Brown, "we want some sleep."

Sister's Fiance—"Well, Bobbie, have you heard that I was to be one of the family?" Bobbie—"Sure, long ago; haven't you?"

W. N. U. 2031

Rubber Boots For Planes

New Idea To Keep Ice From Forming On Wings

Aeroplane have had pants for a long time.

Now they have been given boots. Boots to keep them from crusting the wings with layers of ice.

Many ideas have been tried to allow pilots to traverse storm clouds in safety. Wings were coated with a solution of glycerine, or painted with special varnishes. They were heated by pipes along the leading edge, in the hopes ice would melt as it formed.

But none were completely satisfactory and pilots, particularly mail men flying over mountain stretches, were forced down by the heavy ice on wings of their ships.

Now, however, aviation men learn, the real answer has come.

Rubber boots!

These rubber boots are long wide tubes of very tough and elastic rubber, attached to the leading edges of the wings, tails and the struts forming the undercarriage. The streamlined "pants" that cover the wheels are also equipped with "rubber boots." Small copper pipes connect these rubber tubes to an air pump on the engine. This pump is controlled by the pilot from the cockpit.

When the pilot encounters sleet he starts the air pump. The pump automatically inflates and deflates the rubber boots at the rate of 40 times a minute. The ice which forms on the leading edges where the boots are attached is cracked and broken when the boots are inflated.

As it deflates, the terrific wind, caused by the thrust of the plane through the air, tears the icy particles of ice from the boots, and so the wings, etc., are kept clear.

Recipes For This Week

(By Betty Barclay)

OATMEAL NUT COOKIES

- 1 1/2 cups sifted cake flour
- 1 1/2 teaspoons double-action baking powder
- 1 1/2 teaspoon salt
- 2 teaspoons cinnamon
- 1 teaspoon cloves
- 1 teaspoon ginger
- 1 cup butter or other shortening
- 1 cup brown sugar, firmly packed
- 1 egg, well beaten
- 1/2 cup nut meats, chopped
- 1/2 cup raisins
- 1 1/2 cups oatmeal
- 1/2 cup milk

Sift flour, oats, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream together until light and fluffy. Add eggs, nuts, and raisins; then oatmeal and flour, alternately with milk. Mix well. Drop from teaspoon onto greased baking sheet and bake in moderate oven (350 degrees F.) 18 to 20 minutes. Makes four dozen cookies.

FRUIT CARAMELS

- 1 cup figs
 - 1 cup seeded raisins
 - 1 tablespoon candied orange peel
 - 1 cup stoned dates
 - 1 cup walnut meats
 - 2 to 4 tablespoons orange juice
- Steam fruit for twenty minutes. Cool and put through food chopper with walnuts. Moisten with orange juice until of right consistency to make into small balls or squares.

Sold Her Child

Destitute Mother In Manchuria Sells Son To Pay Grocery Bill

How a destitute mother sold her two-year-old son to pay the grocer's bill was related in court at Harbin, Manchuria.

The woman, 21, a Russian, married a Chinese three years ago. He recently lost his job and to settle the grocer's bill of \$52, she sold her only child to a Chinese merchant for \$50. Full of remorse, she appeared in court and asked police to find the child and return him to her.

On: Made Good, Anyway

Probate of the will of the late Dr. Elizabeth Knight, one of the first women doctors in England and a prominent suffragette leader, showed that she had accumulated an estate of \$120,000. And not so very long ago it was confidently predicted that members of the fair sex could not make good in any profession.

China's Wheat Production

Wheat plays a more important part in the Chinese diet than is commonly realized. With an average crop of about 942 million bushels, more than twice the Canadian production, China is one of the world's largest producers.

Textile glove makers in Germany are rejoicing over an increased demand from America for cotton fabric gloves.

A man is old only when he begins to accept things as they are without trying to better them.

Social Service Costs Heavy

Perplexity Of British Taxpayer Is Explained By Figures

Britain's social services today cost the nation about \$483,000,000 a year. Twelve years ago they called for but an eighth of that amount.

War pensions and the dole have added vast sums, but all social services have made increased inroads into the public purse.

In 1909 the services cost only about \$61,200,000. By 1910, when the Lloyd George National Insurance scheme had begun to operate, this item ran up to \$130,000,000.

Comparison with 1910 figures shows that old-age pensions then cost \$10,073,049. Now, with labor insurance added, the amount reaches \$132,465,000.

Contributions to local authorities which in 1910 called for only \$9,445,395 today absorb \$45,311,000.

Educational expenses in the same period jumped from \$18,551,483 to \$51,205,000, while even the law costs rose from \$4,442,611 to \$15,864,000.

An item, that finds no place in 1910, is the pensions for the fighting forces to the tune of \$17,754,000.

No wonder the taxpayer wears a perplexed air!

Alberta Phone System

Government Would Sell Lines To Farmers' Organizations

Running behind at the rate of a million dollars a year on its telephone system, the Alberta government is negotiating with a large number of farmers' organizations in an effort to sell its rural lines. One sale has been completed, a group of farmers west of Bentley taking over the lines and telephones in that area.

The rural lines may be purchased at sacrifice prices. Poles in the grounds, including anchors, cross-arms, side block, insulator and other accessories are offered at 30 cents apiece. Iron wire will be sold at a cent a pound, or about \$3.40 for a mile of line (two wires).

By Ruth Rogers

SLENDERNESS WILL BE YOURS IF YOU CHOOSE THIS SLIM-LINE COSTUME SLIP

It is designed along very simple lines moulding the figure beautifully through the bust and the hips. The low cut back is smartly shaped.

You can make it in an unbelievably short time. Just two major parts to the pattern. Attach shoulder straps and it's finished.

Style No. 426 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

You can make it at an amazingly small cost. The remnant counters are heaped up with excellent quality silks and satin crepes suitable to fashion it.

You'll buy them at a big reduction in cost. Size 16 requires 2 1/2 yards 35 or 39-inch and 2 1/2 yards binding. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Proposed Forestation Strip in Each Section

Drawing shows how strips of trees would keep highways open in winter. Highways adjoining a section are No. 1, the 10 rod strip of trees, passing both ways through the section is shown as No. 2 and No. 3 representing the areas where snow would drift in winter leaving the other edges clear.

LOVE-LORN OFFICE BOY (a student of the movies): "Mine is no light attachment, Miss Takingshorn. Believe me, baby, I've fallen for you in a big way." —The Humorist, London.

Production Of Butter

Total Output For 1933 In Canada Was 215,917,344 Pounds

The total production of butter in Canada during 1933 was 215,917,344 pounds. This was 1,915,107 pounds more than in 1932. The figures were announced by the Dominion bureau of statistics.

The production of western provinces last year with the 1932 figures in brackets were: Manitoba, 19,557,688 (19,299,877); Saskatchewan, 19,318,542 (17,860,895); Alberta, 23,700,000 (21,018,048); British Columbia, 5,032,741 (5,183,405).

During December the total production of the Dominion was 8,675,445 pounds, compared with 11,241,502 pounds in the preceding month, and 99,554,390 pounds in December, 1932.

International Trade

Nations Have Always Exchanged Goods That Were Similar

While we are waiting for Siam to become self-sufficient in optical instruments and Iceland in salt pork, it turns out that France, the land of fowers and wine, finds it necessary to import her apples and pears from the United States. So perhaps the nations may yet continue to find things which they can profitably exchange among themselves, not only fruit for cotton or silk for copper, but actually fruit for fruit and one kind of silk for another kind of silk. At least men have been exchanging such things since the dawn of history. —New York Times.

Moisture Conservation

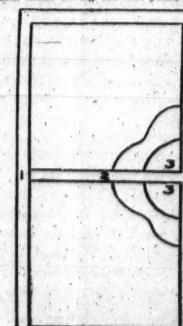

Hon. James F. Bryant, K.C., chairman of the Saskatchewan Commission on Conservation and Afforestation, has announced particulars of a statement which he has

- (1) would result in the desired curtailment of wheat acreage;
- (2) would retain the moisture and prevent the drying out of the land by hot winds;
- (3) would help to keep the roads open in winter;
- (4) would furnish a wood supply for every farm;
- (5) would provide a shelter for birds which would assist in keeping down the insect pests;
- (6) would add to the beauty and attractiveness of the landscape;
- (7) would help very materially to bring back normal rainfall to the drought stricken areas of the province.

This could be accomplished by the planting of trees in strips ten rods wide running East and West, and North and South, through every farm section of land in the prairie districts of Saskatchewan.

If all the trees now growing on the Forestry Farms at Indian Head and Sutherland, and on the Provincial Institutions, Farms at Battledore, Prince Albert, Regina, Moosemin and Weyburn, were made available for this purpose and an additional very large acreage put in next spring for this drive, through the co-operation of the Federal and Provincial Governments, a very large start could be made in the proposal during the first season.

The prospects are that there will be plenty of moisture in the next few years so that the trees would get a good start and grow rapidly, and it is essential that the lessons of the dry years be not forgotten, and the provision made during the wet years.

Proposed Forestation Strip in Each Section. Drawing shows how strips of trees would keep highways open in winter. Highways adjoining a section are No. 1, the 10 rod strip of trees, passing both ways through the section is shown as No. 2 and No. 3 representing the areas where snow would drift in winter leaving the other edges clear.

New York's Latest Idea

City To Have R-production Of Solar System In Miniature

The New York Evening Post says: "Man has been a long time coming to New York. In fact, it isn't here yet."

But it's scheduled for the spring of next year.

It's an "artificial heaven"—a reproduction of the solar system in miniature. And it's to be placed in the planetarium building to be constructed by the Museum of Natural History on the eighty-first street side of its grounds on Central Park West.

Crowning the two-story structure will be a dome having a diameter of seventy-five feet. At the base of the dome the horizon will represent the skyline of New York in silhouette. Before the eyes of the onlookers will be unfolded the mighty pageant of the skies.

"The inverted bowl," in the words of Dr. George H. Sherwood, director of the museum, "shows a stage where the tremendous drama of the heavens, with an 'all-star cast', is presented within the short span of an hour."

Even a heaven—at least, an artificial heaven—has to be financed.

New York's is to be made possible partly by a bond issue of \$650,000 to be purchased by the Reconstruction Finance Corporation and partly by a gift of \$150,000 from Charles H. Towne. The RVC money pays for the building and Mr. Towne's gift provides the canopy of stars. Hence the announcement that the name of the structure is to be "The Hayden Planetarium."

Star-gazing will be a thrilling experience in New York's artificial heaven.

An Aviation Beacon Light

Saskatoon To Have Largest One Built By Torontonians And Vancouverians

An aviation beacon light, that will be visible for distances of more than 75 miles to flying men approaching the city, is being undertaken by the Quaker Oats Company. Prominent aviators have expressed their appreciation at the installation of this facility so much needed for night flying. The beacon will be the largest between Toronto and Vancouver. It will consist of a revolving beacon of white light with a 900 watt lamp having a ray capable of discernment in distances ranging from 75 to 150 miles according to atmospheric conditions; a red stationary lamp of 1,000 watts with its ray directed to the landing field; and a smaller red light directed vertically upward to indicate to aviators danger of landing at the beacon. The beacon will be installed on top of the highest tower of the plant, already used as a daylight landmark by Saskatoon flying men and visible in clear weather a distance of 60 miles.

Making Poultry Pay

Ten Eggs Per Hundred Hens Daily Means Profit

It takes twenty-five pounds of feed for one hundred hens daily, and at present feed prices the income from ten eggs will pay for the feed. Flocks producing more than ten eggs per one hundred hens daily will produce a profit. If flocks are properly fed on a good ration and are kept under sanitary conditions, they will produce more net income than is available at the present time from other branches of the farming industry, states H. H. Aip, University of Illinois poultryman.

Weighing A Ship

Gross Register And Displacement Have To Be Figured

The tonnage of a vessel is of two kinds. First there is the gross register. This means the cubic capacity of the ship's hull added to that of all erections on deck, but excluding space occupied by machinery. This is calculated in units in 100 cubic feet—the Board of Trade ton. Secondly there is displacement, which gives the vessel's actual weight. The part of the ship under water is measured and the weight of water that would occupy its place is calculated.

Starts Fiftieth Reading

Mrs. Belle Gihman, 88, of Fort Scott, Kas., has begun her 50th reading of the Bible and she plans to finish next Christmas Eve, just as she has done for 43 consecutive years. For good measure she has thrown in six other complete readings by following her weekly Sunday School lesson. Mrs. Gihman completed her 49th reading at the home of a daughter in Springfield, Missouri, on Christmas Eve.

In Canada there are some 130 species of distinct varieties of trees. Only 33 of these are conifers, commonly known as softwoods, but they comprise 80 per cent. of standing timber.

A Scotch woman claims to have invented the war tank because she saw many of them in a vision.

Debit Is Too Heavy

Public Bodies And Corporations Of Canada Carrying Big Load

The following article is from the Macmillan Report: Between 1900 and 1913 the total indebtedness of the public bodies and corporations of Canada rose to over two billions of dollars. It is not sufficiently realized that it has grown by over 300 per cent. since 1914. Nor is it true that the war was largely responsible for this. By 1919 the total had risen from 2 to 3.7 billions only. Moreover the actual increase in the burden of debt since 1920 is much greater, because of the fall in prices, than expansion from 7.4 of 8.6 billions of dollars would indicate.

Were this debt held wholly in Canada it would still bear heavily enough on the producer. But the fact that much of the money came from abroad has involved the country in an external debt problem of great magnitude as well. It is clear that all the elements of the Canadian economy must be highly efficient and its natural wealth be abundant if such a burden is to be borne and the population is to continue to enjoy the high standard of living characteristic of North America.

Going By The Records

No Doubt About British First Crossing Atlantic By Air

The very best of newspapers make mistakes at times, but it is a surprise to find such a reputable journal as the New York Times publishing the statement that "The United States was first across the Atlantic in a memorable flight long ago."

The comment was occasioned by the remarkable flight of the American air squadron over the Pacific from San Francisco to Honolulu. We have no desire to detract from the credit due the United States for that recent accomplishment, but, as the Toronto Globe says, the records persist in pointing out that Alcock and Brown, Britshers, flew from Newfoundland to Ireland in June, 1919, that in the following month the airship R-34 went from Britain to New York and back, that the first east-west flight was made by Hunsford and Fitzmaurice in 1928 and that the first west-to-east flight across the South Atlantic was made by Bert Hinkler in 1931.

When the question of the first crossing of the Atlantic by air is raised for discussion Britshers have shown that they are deserving of recognition.

An Unsinkable Lifeboat

Latest Type Is Being Used By Great Britain

In connection with the task of providing Great Britain's coast with an adequate number of motor lifeboats, which task is nearly completed, the latest type of boat is regarded as a practically unsinkable. It can free itself of water by means of valves at the side or bottom; can keep afloat with the help of air-cases even when its watertight compartments are damaged; can right itself in 25 seconds if capsized; and its engines keep running in water-tight shells even though the rest of the vessel is filled with water.

The Royal National Lifeboat Institution has now 120 motor lifeboats and 56 pulling and sailing vessels. The largest type now in service is the 51-foot "Barnett" boat. It weighs 20 1/2 tons, has a speed of just under nine knots under service conditions, carries petrol for 120 miles, and holds 100 people, including a crew of eight. Its cost is \$42,500.

This type of lifeboat also boasts a cabin, a line-throwing gun, an electric searchlight, and an apparatus which can "pour oil on the troubled waters." —St. Thomas Times-Journal.

Piles Of Bibles

Great crowds flock daily to the British museum to see the famous Codex Sinaiticus, bought at a cost of \$500,000 from the Russian government, but few notice another Bible nearby, which is priced at only \$150. This huge family Bible belonged to William Glass, founder in the early 19th century of the first British settlement in remote Tristan da Cunha.

City Under Paris

Under Paris lies the greatest manufacturing centre in the world. It is a complete subterranean city, with a perfect ventilating system and eight miles of illuminated streets lined with mushroom beds and the homes of the persons who cultivate and ship them.

Tree studies in Colorado's Rocky Mountain region indicate that there has been little change in climate for the past 400 years.

Mexico's population is 16,532,722, the Department of Commerce announces.

Sales of American automobiles in India are increasing.

Australia has adopted the idea of holiday cruises around the coast.

BEFORE BABY COMES
A mother is a mother before her child is born.
SCOTT'S EMULSION
furnishes an abundance of the necessary Vitamins A and D for health and strength of mother and child.

SCOTT'S EMULSION
RICH IN VITAMINS

OCCASIONAL WIFE
By EDNA ROBE WEBSTER
Author of "Joretta," "Lipstick Girl," Etc.

SYNOPSIS
Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart. Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia, Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Avis is stunned and Camilla's mother likewise. Camilla decides that she must leave the home of her adopted parents immediately and go to live with Rose, her sister, who is a file clerk in a business house. They decide to take an apartment.

(Now Go On With The Story)

CHAPTER XXVII—Continued

"Well, you win the scholarship and go abroad, and that will give me a chance with your girl," slyly.

"What girl?"

"The rich little dame we quarrelled over."

"Camilla?"

"Sure. Lord, she's a beauty, though."

"She's my wife," Peter announced calmly.

"What?" Gus shouted. His incredulity and consternation surpassed even Mrs. Hoyt's. "Tell me something I can believe."

"Believe it or not."

"When?" he demanded.

"Don't you ever read the society column in the papers? We were married the day after commencement, but it was announced only last week. We finally obtained the Hoyt blessing after keeping it a secret as long as we could."

"What a break for you! I guess I came to the right place for help, all right. You live over there in that place?"

"Not much! Neither will Camilla, after this week."

"You don't mean she's coming here to live with you, in this little room?" he ridiculed.

"No, she wants to live with her sister, until I get going. That was the arrangement from the first."

"Oh, trying a new stunt to solve the struggle problem of marriage?"

"Just about that. It's Camilla's idea, until I can afford to keep her. She's going to work, too."

"Sure, she thinks that's easy, but it won't last. Not for her. Occasional wife, eh?" he grinned. "Well, I have to hand it to you. That's the kind of wife to have these days—one you don't have to take care of. But it might be dangerous to have a wife as beautiful as Camilla so free."

Peter's jaw closed tightly. "That's for you," he said evenly, but the words were like a growl of warning before an angered dog leaps.

Gus stood up casually, but his eye watched Peter warily. "Well, congratulations, anyway, and good luck. I'll run along now. But how about a loan of ten, just for a few weeks?"

What question? Primarily, housewives. But how? Tell them to send their husbands off to the morning with the memory of their breakfast cereal to inspire them for the day? In too many cases, the memory of the breakfast quarrel or Adeline in kid curlers was more predominant.

No, the way to a man's heart might be through his stomach, but the way to a woman's attention was through her children. And if the matter concerned the welfare and happiness of her children, better still.

Juvenile attention, then, was what the new contract required. Weeks and Bowman concluded. The talents of the present staff were reviewed hastily. No, they had no one who filled the specifications. Juveniles—

somewhere in the back of Mr. Bowman's mind, a memory stirred. Somewhere—he had seen some darned good juvenile stuff that had arrested his attention. Was it ad copy already published that he had admired—no, wait a minute. It was the little girl who had said that work was pleasant, and she had done a bunch of stuff to submit for samples.

After considerable search, Camilla's name and address were discovered, and she was summoned to the office of Weeks and Bowman. She had planned that morning to look at apartments, rather discouraged, but determined that she would be happier and perhaps more successful when she had taken up her new life with Rose.

Bates had announced the telephone call while she breakfasted in her room. She reached for the telephone listlessly, expecting to decline another invitation for tea, lunch, bridge, golf, theatre, or dinner. A strange voice greeted her.

"Are you Mr. Hoyt who applied for a position with Weeks and Bowman some time ago?" it asked.

"Oh, yes!" Camilla was almost breathless with excitement. Her heart raced wildly.

"This is Mr. Bowman speaking. You showed me some juvenile samples. I believe."

Her beloved park sketches. "Yes, Mr. Bowman."

"Are you working now?"

"No, I'm not," weakly.

"Well, we have a new contract that requires juvenile stuff. I don't know what, yet, but you might help to advise us in the matter. I can't promise you the work, now, because this program will require a lot of consideration. Would you like to come in and talk with us about it?"

"I wouldn't ask you if I didn't need it like the devil."

"Sorry, Gus, but I haven't ten to my name. I'm just managing to keep myself while I finish this work. After that, I hope to do better."

When Gus had gone, Peter recalled his denial of entering the exhibit, and wondered what it could mean. Had Sylvia misinformed him, or had Gus given up the idea after he started? Peter was puzzled.

CHAPTER XXVIII

It was by a strange chain of circumstances that Camilla obtained her position. Of just such chains of linked coincidences is all life formed, and still folk wonder and exclaim over destiny's inexorable cunning as it shapes and forges the connecting links of time and place and character in their consecutive positions. This is why we insist that life is stranger than fiction. We take for granted in life what we refuse to believe possible in the lives of fictitious characters.

The business depression had called upon the Wheatheart Cereal corporation, as upon what corporation had it not? The manufacture of breakfast cereal for robust children was the business that had built the fortune of Hoyt. Alexander Hoyt I, had conceived the original idea, founded the industry and invented the specialized machinery which manufactured this inimitable food for health and vitality. It was Alexander Hoyt II, who now occupied the chair at the head of the table during directors' meetings, and consulted with chief advisers behind a ribbed glass door marked "President."

But there was no Alexander Hoyt III, who would take up the burden of industry and fortune and carry on for a third generation. Perhaps that was why the twinkle of Alexander Hoyt the second's humor only escaped as far as his eyes and lurked there behind his bi-focal spectacles. A young son to add to the problems and pleasures of his youth, and an older one now to shift the burdens of commerce and finance to sturdy shoulders, undoubtedly would have coaxed laughter to his lips, to trace his happier lines upon a careworn face.

Between the burdens of big business at the office and the executive dominance of Amelia Hoyt at home, the laughter had had little chance. Only Camilla had managed occasionally to coax it into the somber eyes.

Now, the business burdens were doubled, trebled. A crisis was imminent. An efficiency expert was called in. More advertising was prescribed. Not the prosaic advertising on a small scale, but the big advertising that had been good enough heretofore.

Heretofore was not now. Draconic measures were required. Sensational advertising, something novel and expensive—ballyhoo. How much? Half a million at the least!

To advertise Wheatheart Cereal which retained for eight cents a package? Impossible, preposterous, declared the conservative board of directors of Wheatheart Cereal corporation. Might as well close up shop before they were ruined, anyway. Better to make a graceful retirement than a disgraceful failure.

But, argued the efficiency expert, volume of production was the seed and the cure for the present crisis. Only advertising could command volume. The half million invested in advertising would put hundreds to work. It was as endless as a chain letter: advertising experts, artists, copy writers, office auxiliaries, printers, ink manufacturers, paper mill employees, lumbermen, magazine salesmen, et cetera, ad infinitum.

And in the half life plants of the Wheatheart Cereal corporation, the new volume of sales would require a full force back at work. That was the answer to all the business troubles. Attract people to buy, give them work with which to earn money to buy, and the thing moved by perpetual motion on its own momentum.

Finally, the expert had his way. He recommended to handle the new advertising program the firm of Weeks and Bowman. The new contract created a furor in that establishment for big contracts were getting to be memories of the past. A new client ready to spend half a million to advertise breakfast cereal—on one condition: that the half million double its returns within a few months. That required something clever, something which would command attention.

What question? Primarily, housewives. But how? Tell them to send their husbands off to the morning with the memory of their breakfast cereal to inspire them for the day? In too many cases, the memory of the breakfast quarrel or Adeline in kid curlers was more predominant.

No, the way to a man's heart might be through his stomach, but the way to a woman's attention was through her children. And if the matter concerned the welfare and happiness of her children, better still.

Juvenile attention, then, was what the new contract required. Weeks and Bowman concluded. The talents of the present staff were reviewed hastily. No, they had no one who filled the specifications. Juveniles—

somewhere in the back of Mr. Bowman's mind, a memory stirred. Somewhere—he had seen some darned good juvenile stuff that had arrested his attention. Was it ad copy already published that he had admired—no, wait a minute. It was the little girl who had said that work was pleasant, and she had done a bunch of stuff to submit for samples.

After considerable search, Camilla's name and address were discovered, and she was summoned to the office of Weeks and Bowman. She had planned that morning to look at apartments, rather discouraged, but determined that she would be happier and perhaps more successful when she had taken up her new life with Rose.

Bates had announced the telephone call while she breakfasted in her room. She reached for the telephone listlessly, expecting to decline another invitation for tea, lunch, bridge, golf, theatre, or dinner. A strange voice greeted her.

"Are you Mr. Hoyt who applied for a position with Weeks and Bowman some time ago?" it asked.

"Oh, yes!" Camilla was almost breathless with excitement. Her heart raced wildly.

"This is Mr. Bowman speaking. You showed me some juvenile samples. I believe."

Her beloved park sketches. "Yes, Mr. Bowman."

"Are you working now?"

"No, I'm not," weakly.

"Well, we have a new contract that requires juvenile stuff. I don't know what, yet, but you might help to advise us in the matter. I can't promise you the work, now, because this program will require a lot of consideration. Would you like to come in and talk with us about it?"

FREE TRIAL OFFER KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c package. This consists of one regular 7c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it in the toilet, and then, if not entirely satisfied, return the regular bottle in its original wrapper. Your druggist is authorized to return your 7c bottle immediately on your request. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by: Kruschen Brothers, Ltd., Manchester, Eng. (In Canada, 1774, 1775, 1776, 1777, 1778, 1779, 1780, 1781, 1782, 1783, 1784, 1785, 1786, 1787, 1788, 1789, 1790, 1791, 1792, 1793, 1794, 1795, 1796, 1797, 1798, 1799, 1800, 1801, 1802, 1803, 1804, 1805, 1806, 1807, 1808, 1809, 1810, 1811, 1812, 1813, 1814, 1815, 1816, 1817, 1818, 1819, 1820, 1821, 1822, 1823, 1824, 1825, 1826, 1827, 1828, 1829, 1830, 1831, 1832, 1833, 1834, 1835, 1836, 1837, 1838, 1839, 1840, 1841, 1842, 1843, 1844, 1845, 1846, 1847, 1848, 1849, 1850, 1851, 1852, 1853, 1854, 1855, 1856, 1857, 1858, 1859, 1860, 1861, 1862, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, 1872, 1873, 1874, 1875, 1876, 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422

FOOTBALL NEWS

A meeting of the Lacombe Football Club will be held in the Adelphi Hotel on Saturday, Feb. 17th at 9:15 p.m.

IN MEMORIAM

In loving memory of Olive Avery, who passed away Feb. 12, 1933. Just like a flower in bloom; So young, so fair, so loving; Yet called away so soon.

Quietly and quickly came the call, The sudden death surprised us all; We have lost what God has gained, One of the best the world contained.

Every remembered by Mother, Daddy, Jackie and Grandma.

LACOMBE GIRL WINNER

In the essay competition under the auspices of the Holstein-Friesian Association, on the subject "Why Holstein Milk is the Best," Miss Muriel Graydon, daughter of Mr. and Mrs. John Graydon, was successful in securing third place among a very large number of contestants.

AT THE AVALON

"One Sunday Afternoon" With every picture produced in Hollywood there is a search for some sort of another.

But Russell Pierce, head of Paramount's property department reported the strangest one during the filming of "One Sunday Afternoon" showing this week end at the Avalon theatre. Gary Cooper is starring in this picture with Fay Wray, Frances Fuller and Neil Hamilton.

Following is a list of types, props and what-nots, which had to be found before the colorful story of the early 1900's could go into production:

A half dozen tobacco chewers adept at whittling; a lightning rod; hay wagon (for moonlight sonatas); bunny hug and schottische dancers; accurate two-fingered spitters; a trained horse-fly; champion horse-shoe pitchers; men with natural hand-bar whisks; albums showing the various types of beards worn in 1900; men or women experienced in staging a charivari; the kind of lingerie worn by the clinging vine of yesteryear; an Edison cylindrical gramophone; a stereoscope with assorted slides, and one of the wooden Indian cigar store markers.

Comedy "Asleep in the Feet," Pitts and Todd. Also a Mickey Mouse.

Show starts Thursday and Friday at 8:15; Saturday 7:30 and 9:15.

Coming: Paul Whiteman in "King of Jazz." All in color Feb. 22, 23 and 24.

Mae West "She Done Him Wrong" March 1, 2 and 3.

"Moonlight and Pretzels" Mar. 8, 9 and 10.

W. J. Trott, for several years operator of the Lacombe Chop Mill, has commenced the construction of a new business block on Glass St., and intends going into lumber, harness, coal and all builders' supplies. He is building a front on the building formerly occupied by Geo. Vickers as an implement warehouse, and has purchased the two lots adjoining to the north which will be equipped for a lumber yard. He expects to be ready for business in the early Spring.

Remember the masquerade dance at Lincoln Hall tomorrow (Friday) night. Come and dance to Bob Paulsen's Dance Band—the best music.

THE TOWN ELECTION

More than usual interest was shown by our ratepayers on Monday, on the occasion of the annual election for Councillors. David Hay is the only new face on the council board, Messrs. Dwan and Cameron being returned by substantial majorities. The standing of the candidates at the close of the poll was:

A. Dwan, 850.
B. S. Cameron 811.
D. Hay 307.
W. J. Taylor 208.
Hal Laird 116.

The 1934 council is composed of Mayor, Edwin H. Jones, K.C.; P. C. Owen, W. Avery, T. Wilkes, B. S. Cameron, A. Dwan, D. Hay.

SHOWER FOR BRIDE

On Friday evening last, Miss Hazel Perkins was hostess to a shower given in honor of Mrs. Lloyd Perkins, (nee Gladys Henzley).

The bride was greatly surprised on her arrival home to find a group of her friends assembled to greet her. The room was nicely decorated in blue and pink. A large basket heavily laden with gifts was drawn into the room by little Myrtle Brevik and Master Reginald Van Wassenhove.

Besides the bride and groom and other members of the family, those present were: Mr. and Mrs. Bart Attrel, Mrs. B. Thompson, Mrs. David Shaw, Mrs. Paul Brevik, Mrs. Tommy Armstrong, Misses Mildred Mottate, Phyllis Lee, Blyth Webster, Edith Thompson, Lucy Howe, Flore Chretien, Sadie Sampson, Minnie Brown, Olive Chretien, Myrtle Cook, Gladys Rusk, Renie Grimes, Dorothy Ogilvie, Jesse Riddick and Mildred Frizell.

The evening was merrily spent in playing games and a number of comical songs sung by Flore Chretien, after which a lovely lunch was served. Everyone repeated a good time and departed wishing the bride much joy and happiness in her future life.

SPRUCEVILLE NEWS

The Juniors are putting on a spot dance in the hall, Friday evening, Feb. 23rd. Special prizes will be given. Wright's Orchestra will furnish the music.

Mr. and Mrs. George Orme and family spent Sunday with Mr. and Mrs. Nelson Hall.

Mr. J. B. Crooker has been confined to his bed for a few days.

The Annual Meeting of the Spruceville Community hall will be held on Thursday evening, Feb. 22nd at the hall. The board requests every member to make an effort to come, for there is important business to discuss.

Mr. and Mrs. Nelson Hall entertained a number of their friends to a Progressive five hundred party on Tuesday evening.

The Progressive U.F.W.A. local No. 234 have had a very successful year in 1933 and thought others might be interested in an outline of our activities.

We have seventeen members and held our meetings in afternoons once a month, with an occasional evening meeting.

The Local sent two delegates to the Federal Constituency Convention, one delegate to the Annual Convention, also one delegate to the Junior Conference.

We donated \$8.50 to the Red Cross, \$2.00 to Frances Bateman Memorial and \$5.00 to the Sunshine Santa Claus fund.

At our afternoon meetings we made several quilts, which were donated to the Red Cross and needy.

One of our outstanding accomplishments was the forming of a Junior Local which is progressing very favorably.

Our annual picnic was held at Gull Lake at which the Junior Provincial Pres. Mr. Hopkins gave an interesting address.

Plays sponsored by the U.F.W.O. realized about \$80.00 which was used for the benefit of the Community Hall.

Our annual Chicken Supper and

Helping to Solve Your Business Problems

When a customer of the Bank of Montreal handles a transaction through this old-established institution, he has at his command unsurpassed facilities in every department of banking.

But there is another advantage that is his—the wealth of seasoned experience in business, accumulated during the Bank's long history of 116 years, that works for his benefit at each contact with our officers.

We invite you to consult us freely on your business and financial problems.

Look For A Silver Lining

During periods of difficulty and discouragement it is natural that the minds of people turn to and dwell upon those conditions which are the source of their difficulties and the cause of their discouragement. In fact, the tendency is for people to dwell upon these things to the almost complete exclusion of subjects which provide reason for confidence and encouragement.

This it may be repeated, is quite natural; just as natural, in fact, as it is during periods of rapid development and general prosperity to close one's eyes to all warning signs along the road. In other words, the vast majority of people are enthusiastic optimists, and quite impatient of words of warning and caution from more thoughtful observers, when things are going well, but are just as confirmed pessimists, and impatient with those who point to favorable signs, when the existing state of things is bad. Very few of us take note of the cloud small as a man's hand coming up on the horizon when the noonday sun is shining, and the number is equally small who can see the silver lining to the clouds when the skies are completely overcast.

As a result of this tendency, mankind plunges thoughtlessly ahead, the great majority sweeping all others long for good or ill. During boom periods, when the cry is full steam ahead, and when this, that, or the other great project involving the expenditure of millions of borrowed money is being advocated, persons who tender the advice that we should give more serious consideration to the project, count the cost, and give a thought to the ultimate and inevitable future payment, are termed back-numbers, tightwads, non-progressive. Governments which at such times tell the people that there is a limit to this discounting of the future, that a pay-as-you-go policy is much wiser, are swept away. The spenders take control.

But when the bubble bursts, when prosperity vanishes and depression takes its place, when the free spending comes to an end, and the bills are presented for payment, and taxation to meet those bills is imposed in heavier and heavier doses, then those who were most outspoken in favor of incurring the bills and most contemptuous of those who urged caution, are the first to complain of the shortsightedness of politicians and Governments upon whom they proceed to lay responsibility for all their troubles. On the other hand, during the prosperous periods most people take full credit to themselves for their own advancement, their increased prosperity, and the general improvement of their business and their community, and are inclined to give little or no credit to anybody else.

After all, these are common traits in our human make-up. It is well, however, to occasionally take a good, square look at ourselves, to weigh ourselves in the scales, to be absolutely honest in an impartial sizing-up of ourselves, to consider our own past views and actions and their effect upon present day conditions. Furthermore, in this present period of discouragement, it is well to overcome our natural tendency to see everything through blue spectacles, and to take a look at the silver lining to the clouds.

Notwithstanding all our economic problems, Canada is free from some of the worst of those which afflict the people of other nations. For example, what community in the whole length and breadth of Canada has been shocked and outraged by a lynching in its midst, such as is more or less a commonplace occurrence in the United States? How many kidnappings have occurred in Canada even during these times which unquestionably are an incentive to law-breaking and violence, although kidnappings are daily happenings across the line? And why is it such a marked difference for the better prevails on this side of an imaginary line?

The answer is to be found in Canada's far superior judicial system, resulting as it has in absolute confidence that even-handed justice will be administered, thus rendering the invoking of lynch-law unnecessary on the one hand, and proving a deterrent to kidnappers, murderers, and gangster activities. The tradition of respect for law and order in Canada is a great national asset, bringing comfort and security to all our people, and providing a sure guarantee against mob law and gangster rule in this Dominion. It is a strong foundation upon which Canada rests and will build throughout the future.

More of the silver lining is seen in the absence of strikes and riots and picketings in this Dominion as compared with many other lands. There has been an occasional small strike in Canada, one or two small clashes with the officers of the law, an isolated case or two of picketings, but there have been no killings, and, generally speaking, peace and order have prevailed throughout the period of the depression. Canada's legislation dealing with industrial disputes has been effective even under the strain and stress of the present economic upheaval because that legislation is fair to all, humane in its principles and effective in its operation and administration in providing justice for all. In this respect, Canada presents a picture that is most gratifying when placed in contrast to most countries.

In Canada, too, our political system and institutions have stood the test. Revolutions have taken place in other lands, in which lives have been lost, property destroyed, liberties taken away, dictatorships established. In Canada, our people have been moving forward through the orderly processes of democratic, representative government. There has been no revolution, nor will there be. Confidence has been maintained in our existing form of government, and it is proving flexible enough to the people's will to enable them to achieve such reforms as they desire.

Many other examples might be cited, and will occur to readers of this article, but those mentioned are given as an incentive to people to try and overcome their natural tendency to look constantly on the dark side of things in these days, and, for a change, confidently to study those that are not only brighter but contain promise of still brighter, better things ahead.

Erudite Women

822 Women Receive Degree Of Bachelor Of Arts

Women will rule in the arts of tomorrow, if figures released in the report of the president of the University of Toronto can be accepted. It is a strong foundation upon which Canada rests and will build throughout the future.

In the degree, master of arts, there were 77 men admitted to the degree and only 41 women.

Trinidad's deep-water harbor project is to be started at once.

Second-hand American machine tools are being sold in France.

Conditions Are Improving

Evidence Of Upturn Of Business Shown By Increase In Sales Of Salada Tea

An indication that conditions are improving and that business is on the upturn is shown by the fact that the Salada Tea Co. sold over 54% more tea in Western Canada in 1933 than in 1932.

This is especially significant since Salada is a quality tea.

The Food and Drugs Act of Canada requires that flour should not contain more than 13.5 per cent. moisture.

The South India air service is to be extended to Colombo, Ceylon.

Household Drudgery

The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relief? It is any wonder she becomes nervous and irritable, has hot flashes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

Woman Botanist Has

Made Hazardous Trip

Tale Of Heroic Journey Brought Down From Akhivik

From out of the fastnesses of Canada's frozen north emerged a tale of a woman's hazardous journey along 350 miles of the most dangerous part of the Arctic coast.

Miss Isobel W. Hutchison, young Scotswoman, completed the journey, braving hardship, hunger and utter cold, and arriving at her destination, Akhivik, just before Christmas. Word of her exploit was brought to Fort McMurray by Pilot John Hythell, Canadian Airways, returned from several months in the far north.

The Scotswoman made the trip by dog team, Pilot Hythell said, when winter overtook her as she was making her way to Eskimo schooners around from Point Barrow. When the ice formed she had to slide. It has been Miss Hutchison's intention to make connections with the Arctic boat Pattison, near Point Barrow, but Capt. Peterson was unable to take her to her desired destination, Herschel Island. She therefore chartered Eskimo schooners along the route to help her on her way.

Incidentally, about this time Miss Hutchison had the distinction of visiting and bringing several souvenirs from the derelict Hudson Bay Company's boat Baychino, which was then still afloat about 15 miles off shore.

Later, and after a succession of setbacks, she was finally frozen in about 350 miles short of her goal. This distance with severe hardship and difficulty she covered with borrowed dog teams, arriving at Akhivik a few days before Christmas.

Apparently, stated Pilot Hythell, she was little the worse for this tremendous journey, which if only on account of the excessive cold this winter, would have daunted the most hardened of northern travellers.

Miss Hutchison is collecting rare flower and plant specimens for the Royal Gardens at Kew, England, and for the same purpose spent many months in Greenland a year ago. She is slight in build, Mr. Hythell continued, and her appearance certainly belies the staunch heart and dogged determination which must accompany one who could so compete with the hardy Eskimo in his own terrain.

White Collar Women

Most Unemployed Office Girls Willing To Do Any Work

The white collar women are giving Los Angeles a lot of worry, says W. L. Clark, in Border Cities Star. There are some 14,000 of these girls out of work and the civic authorities are at their wits' ends to know what to do about it. The white collar girls are the stenographers, bookkeepers, secretaries, receptionists and nurses for doctors and dentists, comptometer and other office machine operators, saleswomen, bank girls, and others.

They call them the white collar girls because they are the ones who work side by side with the white collar men in offices and stores. With 14,000 trained women and girls seeking work and finding none, Los Angeles is faced with a serious quandary.

Nor is the question unique in California. Every city in Canada has the same problem to solve. Windsor's white collar girls are anxious to work, but some of them cannot find any jobs. In fact some of them are only too pleased to work for anything at all.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel

Your liver is a very small organ, but it is one of the most important in your body. It is the factory that produces bile, which is necessary for the digestion of food. If your liver is not working properly, you will have indigestion, constipation, and other ailments.

Cartier's Little Liver Pills will soon bring back the normal action of your liver. They are gentle, safe, and effective. Ask for them by name. Return bottles to the manufacturer.

A Robot Conveyor

London School of Economics Has Installed Remarkable Machine

A remarkable robot conveyor, which can read 1,200 books in an hour to 240 different places, has been installed in a library at the London School of Economics. "We have installed," said Mr. Headcar, the librarian, "a book conveyor which is a veritable robot. You fill in an application form, and by pressing a button the robot will deliver a book to you in a matter of seconds. It is the only one of its kind in the world."

St. Bernard monks who are to establish a hospice in the Sierras, between Switzerland and Tibet, are teaching the natives how to ski, a new sport in that part of the world.

Turks are developing a sweet tooth, and sugar production there is growing.

CHILDRENS COLD

New Treatment For Disease

Hospital In London Is Testing Out Wireless Waves

Raising a fever by wireless waves is a new way of treating disease in St. Bartholomew's hospital, London, where a test is being made of an entirely new thing in hospital treatment.

Some months ago it was noted that workers at wireless generating stations exposed to the concentrated rays sometimes had a temperature as high as 100 degrees or 108 degrees Fahrenheit, though they did not feel unwell as a result, hence the introduction of wireless waves in St. Bartholomew's.

It is hoped that the machines now installed will produce not only a general rise of temperature, but a local rise. It may be that some of the tissues or organs of which the body is composed are particularly susceptible to the rays, and if so it may be possible to heat these tissues and so cure disease in them without disturbing the healthy structures in their neighborhood.

A general fever, artificially produced has been found of value in certain forms of illness, but a local fever, in one particular organ or collection of tissues, might prove even more useful. A local rise of temperature can sometimes be produced by passing an electrical current through the body (diathermy), but the heat is said to be formed near the surface. Wireless waves may warm organs which are deeper down.

Canadian Apples

Fruit From Canada Exported To 33 Countries

If the globe trotters who find the apples served to them in one form or another in different parts of the world are of a particularly delectable flavour, the probability is that the fruit was grown in Canada. The Canadian apple has earned a wide reputation for delicacy in whatever form it is served. In 1933 Canadian apples were exported to 33 countries. From the early part of last October until the end of the first week of January the exports totalled 1,706,800 barrels and 1,633,711 boxes, as compared with 743,195 barrels and 1,471,421 boxes in the corresponding period of 1932-33, an increase of 130 per cent. and 11 per cent. respectively.

In 1933 Canada had a bumper crop of apples, the total output estimated at 4,611,700 barrels, an increase of 873,740 barrels over the production in 1932.

In the apple orchards of the Dominion, which are in the provinces of Nova Scotia, New Brunswick, Quebec, Ontario and British Columbia, there were, according to a recent census, 8,303,866 trees of fruit bearing age.

Going Back In History

The finding of carved amber jewelry by Fr. Mallon in his excavations at the sites of the ancient cities of Sodom and Gomorrah in Palestine, reported in a recent dispatch, adds at least 4,000 years to the definitely recorded history of the ancient material and proves that as long as 7,000 years ago there was traffic either overland across Europe or by the sea route around the Spanish peninsula to the Baltic Sea, the world's sole source of amber.

More Lumber Exports

British timber men foresee a substantial increase in Canadian lumber exports to the United Kingdom as a result of the government's decision to cut by 100,000 standards the amount of soft wood that may be imported this year from the Soviet.

Returning ocean traveller describes a storm so bad that nobody could eat his cake and have it.

Exhibits Carefully Guarded

Collectors From Fifty Countries Viewed Rare Stamps In Vienna

Break stamps from all over the world with heads upside down, missing letters, and some with peculiarities said to have been made intentionally by small states in need of funds from stamp collectors, were popular features of the international philatelic exhibition held recently in Vienna.

More than five hundred of the foremost stamp collectors in the world, from fifty different countries, attended. Exhibitors included a large number of states and post offices. Policemen guarded a number of the most valuable stamps in the world, which were kept in large iron safes, with open doors.

There were picture stamps showing beautiful landscapes and buildings from all parts of the world, art stamps with reproductions of famous paintings, advertising stamps to increase tourist traffic and many "jubilee" stamps to commemorate the anniversary of great events.

Counterfeit stamps were on view, as well as hundreds of revenue stamps that had been turned over to post offices and surcharged, and many special boat stamps dating from the time when ships had the right to conduct independent post offices. Air stamps proved among the most interesting. Here were letters that had been carried on all the famous air trips in flying history. One saw letters that had been borne by Amy Johnson, Mollison, Byrd, Kingsford-Smith, the Graf Zeppelin, and practically all the noted aviators over all parts of the earth, many of which had been autographed.

The "hero" of the exhibition was the "Blue Mauritius," one of the most famous philatelic rarities in the world, a two-penny stamp owned by Mr. A. F. Lichtenstein, of New York. Together with two red penny stamps of Mauritius, it had the distinction of occupying a whole iron safe guarded by two policemen, who were extremely vigilant, and made one feel like a culprit if one looked too long and intently at these tiny scraps of paper.

The Mauritius family shared the spotlight with three exceedingly rare red Austrian stamps used in the island of Corfu in 1863, and with a unique yellow three penny Swedish stamp with a letter omitted.

The exhibition, which took three years to prepare, was a stamp university, and was studied for days by the stamp collectors who visited it.

Demand Exceeds Supply

Various Ways To Increase Gold Production Are Being Tried

A dyed-in-the-wool gold miner, prospector and developer rose up during a discussion about metals to say that he was sticking for gold, because no matter what the competition or production, one didn't have to worry. The demand exceeded the supply.

Regarding silver, the latest opinion voiced around the street is that Ottawa may be talking along the same lines for the white metal as Washington has in its "domestic" silver scheme.

Reports that coast interests are planning to dredge the Pacific Ocean for gold-bearing sand, are not new. Only a few years ago the same plans were talked about down around Los Angeles, but not furthered and scientists have from time to time told of gold values washed into the oceans. There have been reports of science even going so far as to believe gold can be manufactured.

Had Adventurous Life

Capt. Carey, Former Commodore Of C.P.R. Fleet, Crossed Atlantic 600 Times

Word was received at Montreal of the death at Walsley, England, of Captain Francis Carey, 81, former commodore of the Canadian Pacific fleet, who retired in 1914.

Captain Carey had an adventurous life in his many years on the sea. He crossed the Atlantic 600 times, once loved a huge passenger boat 800 miles in December seas, transported a whole harem, and was the first commander of the ill-fated Empress of Ireland.

The aged captain once successively commanded all the "lake" boats, on the Beaver line and was also with the Elder Dempster line before becoming commander of the Empress of Ireland in 1908.

Famous Airman To Complete Sir Charles Kingsford-Smith, Australia's famous airman, will complete in the century air race from London, England, to Melbourne next summer. A prize of \$75,000 is being offered in connection with the celebration of the centenary of the State of Victoria in October.

Japan is now exporting matches at the rate of 1,600,000,000 pounds a month.

Holland is Canada's leading foreign market for buckwheat.

American industrial machinery is increasing in popularity in India.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

Although forty years of age he is of course not considered old, yet because Presbyopia usually manifests itself at about that age, it is commonly referred to as "Old-age sight." How often we hear people say "my sight is just as good as it ever was except for reading and sewing." Yes, this condition is common to many. Let us consider the cause of this natural development which causes so much inconvenience after middle life.

We have fully explained that in order to have a clear image of a distant object focused on the retina, the length of the eyeball and the curvature of the Cornea and Lens must be properly related. The first two may be considered as fixed as to length and curvature respectively, but fortunately the Lens is elastic and it is this elastic power or "Accommodation" which enables us to focus objects near at hand. Accommodation is most powerful around twenty years of age and then gradually declines. There is none left at age sixty-five or seventy.

For sustained close work a certain amount is absolutely necessary, and this the average person of forty-five does not possess, hence, the necessity of assisting the failing Accommodation by artificial means in the form of glasses and as the Accommodation continues to decrease, the strength of the lenses must be increased. This change should be every two or three years.

In an individual with normal distant vision, such glasses, although necessary for reading, will blur objects across the room. Also the Presbyope who needs glasses for distant vision will require a different strength, or Bifocals, for near work.

The first symptoms of Presbyopia are difficulty in reading by artificial light, having to hold the paper twenty or more inches away instead of fourteen or sixteen inches. With advance of time other complications arise. The muscles in an effort to force a focus, become unbalanced in their relation to each other, causing eyestrain, headaches, eyeaches, burning sensation, watery eyes, print blurred and runs together and drowsiness after a short period. These are not only the symptoms of uncorrected Presbyopia but are also signals to older Presbyopes that it is "time for a change."

Since the eyes have to converge when reading, how remarkable it is that the same nerve, the ciliary or motor oculi, supplies the power both for Accommodation and Convergence in order that they may work in harmony and when they fail to do so by neglecting to wear the proper glasses, trouble is bound to follow.

Presbyopia is not a disease but is due to natural progressive changes in the Ocular system and when present the eyes need assistance—not continued abuse.

(To Be Continued)

A Second Houdini

English Vicar Skilled In Freeing Himself From Manacles

The Vicar of Earls Barton, Northamptonshire, England, Rev. L. A. Ewart, is something of a second Houdini and, if he had not adopted the church as a career, might have won fame by his remarkable skill in escaping from iron or handcuffs in the presence of friends and acquaintances.

At a British Legion dinner at the neighboring village of Irchester he astonished the company by a masterly display of handcuff manipulation. His hands were manacled behind his back, but after five minutes the vicar was free, both locks having been opened.

Mr. Ewart has been known to escape from 25 locks in 10 minutes. He has freed himself from American leg-irons, Siberian fetters and German handcuffs.

On one occasion a police inspector (off duty) at a gathering, fastened a pair of handcuffs on Mr. Ewart, but had no key to release the vicar if he failed to escape. In a few moments the vicar was free. Then he induced the inspector to be handcuffed. Smilingly, however, he declined to let this method of escape and the inspector had to return to the police station to get the handcuffs removed.

Ruling Is Strict

Producers Require Permit To Pack Grade A1 Eggs

Grade A1 of Canadian eggs is a super-grade and the packing of this grade may be done only by producers authorized by permit by the Dominion Department of Agriculture. Application by producers desiring to pack this grade should be made to the Poultry Services, Dominion Live Stock Branch, Ottawa, Grade A1, it is explained, was included in the recent revisions to the Canadian Standard egg grades for two reasons—first, to provide a place for eggs which, because of production conditions and speed of marketing, merit some recognition over the top commercial fresh egg grade, and, secondly, to establish a grade which would serve as an ideal towards which producers would be encouraged to work. Grade A1 eggs are not a product intended for inter-provincial trading or long shipment. They are produced only under careful production conditions and are marketed without delay.

Fifth Exporting Nation

Canada Held This Position During First 10 Months Of 1933

Canada held her position as the world's fifth exporting nation during the first 10 months of 1933, but the United Kingdom replaced Germany as the second on the list, according to figures compiled by the Dominion bureau of statistics from League of Nations sources.

The United States continued to hold first place by a narrow margin over the United Kingdom, while Germany occupied fifth place; France, fourth, and Japan, sixth. The relative places are computed on values of exports in gold dollars.

"Girls were harder to kiss in your day, weren't they, grandpa?" "Mebbe, mebbe," ventured the old gentleman, "but it wasn't so blame dangerous. The old 'parlor sofa' wouldn't smash into a tree about that time."

According to the Dairy Industry Act, "dairy" means "milk" where the milk or cream of less than 50 cents is manufactured into butter.

Feeding Methods For Turkeys Sanitation should be practical in all feeding methods with turkeys. Never allow the birds to pick their feed from the ground, but always from troughs or dishes of some kind. All feeding utensils should be kept perfectly clean. It is also important that these feeding utensils be moved regularly from place to place.

Did Not Prove Anything When a doctor who said that because a man could not stand with his feet together and his eyes closed, without swaying, he was drunk, the recorder at the Old Bailey challenged him to do so himself. The doctor swayed and the case was dismissed.

Cotton growing is being tried in Yunnan province of China.

Chile Annexes An Island

Took Possession In 1888 But Title Was Not Registered

Easter Island, one of the great archaeological mysteries of the Pacific, has been officially added to the Chilean national domain. Back in 1888 Chile took formal possession of the island, a tiny triangle of volcanic origin, 2,300 miles out in the Pacific ocean from the Chilean port of Caldera, and the expedition went out to plant the flag. Ten days ago an inquisitive government official discovered the island never had been placed in the official records, an act necessary to possession of title. The registry was made as quickly as possible, after which authorities aware of the secret took a deep breath.

Empire Mail Service

Studying Routes Between United Kingdom And Canada

The aeronautical correspondent of the London Morning Post declares a cabinet committee was considering steps to launch an intensive period of Empire air communication expansion and that it was studying the routes between the United Kingdom and Canada and the United Kingdom and Australia.

The expansion, the correspondent said, would include faster air mail services and a modified subsidy system. The committee sought, he added, to develop an air mail service comparable with that in the United States.

Buck That

Cough or Cold

It costs only a few cents to keep a cough or cold with BUCKLEY'S MENTHOL. Because Buckley's is so good that only a few doses are needed to subdue the toughest cough or cold. And Buckley's can be diluted with three times its volume of water without losing its full benefit.

Will not open your stomach. Just take one, instant relief from cough, cold, flu or headache. Play safe. Refuse substitutes. Buckley's is real everywhere.

Fifth Exporting Nation

Canada Held This Position During First 10 Months Of 1933

Canada held her position as the world's fifth exporting nation during the first 10 months of 1933, but the United Kingdom replaced Germany as the second on the list, according to figures compiled by the Dominion bureau of statistics from League of Nations sources.

The United States continued to hold first place by a narrow margin over the United Kingdom, while Germany occupied fifth place; France, fourth, and Japan, sixth. The relative places are computed on values of exports in gold dollars.

"Girls were harder to kiss in your day, weren't they, grandpa?" "Mebbe, mebbe," ventured the old gentleman, "but it wasn't so blame dangerous. The old 'parlor sofa' wouldn't smash into a tree about that time."

According to the Dairy Industry Act, "dairy" means "milk" where the milk or cream of less than 50 cents is manufactured into butter.

Feeding Methods For Turkeys Sanitation should be practical in all feeding methods with turkeys. Never allow the birds to pick their feed from the ground, but always from troughs or dishes of some kind. All feeding utensils should be kept perfectly clean. It is also important that these feeding utensils be moved regularly from place to place.

Did Not Prove Anything When a doctor who said that because a man could not stand with his feet together and his eyes closed, without swaying, he was drunk, the recorder at the Old Bailey challenged him to do so himself. The doctor swayed and the case was dismissed.

Three Gold Mine Shafts In Ontario Workings Descend To A Depth Of Over A Mile

It was only a few years ago that a depth of 1,000 feet in Canadian gold mining was considered a wonderful accomplishment, but today there are in Ontario three mines with shafts down over 5,000 feet from surface, or over a mile in depth. Knowledge of miles of underground tunnels and no evidence that there is a limit to the depths to which mining can be carried in the primary Pre-Cambrian rocks.

Engineering feats in Ontario to permit of mining at this depth compare with developments anywhere in the world and mere words fail to adequately describe the extent of the undertakings. For the layman it is hard to visualize a depth of two miles, over 11,000 feet, or the objective already set by some of the operators, much less one mile. The comparisons above, particularly with the Bank of Commerce building, should prove more realistic than adjectives. It is the belief of eminent Canadian geologists and engineers that gold mines in the Dominion will in time become the deepest in the world. At least heads of two of the largest producing companies have already signified their intention of carrying work down at least 10,000 feet, making the province, however, that the ore goes to that depth.

The deepest gold mine in the world today is the Village Deep, in South Africa, which at last reports was down over 7,000 feet. The greatest depth in this hemisphere is at St. John Del Rey mine in Brazil. This property which has been in operation for over 100 years has a shaft down about 7,600 feet.

The depth to which operations can be carried in Canada would appear to be unlimited and only bound by "white-man working" temperatures. Underground rock temperatures in Canada are about an average of 20 degrees lower than those of the Rand, South America and Indian mines. Further there is no danger from crumbling walls and roofs and it is claimed that the best tunnels are those at the lowest levels in mines throughout the Dominion.

Kirkland Lake Gold Mine, in the Kirkland Lake camp, has the deepest workings in the Dominion. The shaft is now down below 5,500 feet and was recently cut at a depth of 5,450 feet. With the present operating equipment operations can be carried to a depth of 8,000 feet. In the same camp the south shaft extension at the Tech-Hughes property is down to the 48th level, a depth of 5,500 feet and the No. 3 shaft has reached the 42nd level. These shafts will be carried to a depth of 6,750 feet, which will be the 55th level. The Lake Shore shafts are down 4,500 and 3,850 feet respectively, the Wright-Hargreaves shafts approximately 4,000 feet and the Sylvanite No. 2 shaft down 3,600 feet. In the Porcupine camp the new mine, started about a year ago from the No. 11 shaft, which is bottomed at 4,000 feet, is expected to reach a depth of 5,375 feet early in the new year and has already passed 5,000 feet. The present deepest workings at the Hollinger are at 4,000 feet but further sinking is to be carried out at once. The main shaft at Dome Mines is down 3,200 feet, Conlaurem at a depth of 2,500 feet, with an objective of 4,000 feet and the Vipond workings comparatively shallow compared with the rest and stand at 1,450 feet—From Gold, Magazine of the North.

Pilgrimage To Mecca

South African Resident Does Not Wish To Leave Any Doubt Behind

An advertisement in a Cape Town, South Africa, paper says: "Hadjie Abdurrahman Bedford, of Cape Town, wishes herewith to inform his numerous friends that he is leaving South African shores on his eighth pilgrimage to Mecca, accompanied by his wife, Mrs. C. Bedford. It must be added that the Hadjie was born in Cape Town on the 2nd February, 1873, and made his first pilgrimage in 1892."

It must also be recorded that the Hadjie is leaving for the eighth time to Mecca with as clean a record as he left in 1892 and all other times, and in that direction. If there are any person or persons who have legitimate claim or claims for debt against the Hadjie, such person or persons are requested to come forward and present same before his departure."

It was testified at a trial in Thames police court, London, in which a couple had falsely reported that their car had been stolen, that an "election" message sent by the police had cost \$140.

"Are you going to take this lying down?" shouted the politician. "No, the shorthand reporter is doing that," cried a voice.

W. N. U. 2651

Standardized English

Having Universal Pronunciation For Technical Words Is Not Possible

The advisory committee of the British Broadcasting Company on spoken English, which comprises an Irishman, two Welshmen, two Scots and an American (no Englishman!) reports that it is not possible to legislate for the English language as if it belonged to the British Isles alone, but the committee feels it is desirable to endeavor to obtain a universal pronunciation for technical words.

Surely that is impossible. Give a Londoner, a Yorkshireman, a Dorset man, a Scotman and an American, all speaking the English language, a new item to read aloud, or a series of selected words to pronounce, and even if given to them syllable by syllable they will each pronounce the words differently. There is some inherent factor of speech that makes a man pronounce words in his own particular way, and no amount of coaching will teach him to do it differently.—St. Thomas Times-Journal.

Blazing A Trail

Thoughts Constantly Going Through Brain Soon Form Habits

The brain is like a dense forest, and our thoughts are backwoodsmen blazing a trail. When once a certain thought has passed through it, it is easier for the same kind of thought to come again. That is habit. Fold a piece of paper, then spread it out. It is easier to fold it again in the same crease than in any other way. That is habit. So, to create a habit of cheerfulness, we must send cheerful thoughts along again and again until the trail in our minds is thoroughly blazed. Then it will be easy to be cheerful.—Rev. R. P. Anderson.

SHOULDERS COME IN FOR CONSIDERABLE ATTENTION THIS SEASON

If you are looking for a youthfully smart dress, here's your number! It has the up-to-the-minute shoulderline. And note the pointed slimming neckline. Black crepe satin made the original model.

There is also a little scarf collar—a straight affair worn as shown in miniature view. It gives this model just that hint of outdooriness so "just right" if you want to be coquettish. It is made with long sleeves and fashioned of wool crepe—now so modish.

Style No. 538 is designed for sizes 12, 14, 16, 18, 20, 22, 24, 26 and 28 inches bust. Size 16 requires 3½ yards 38-inch fabric.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

JACK TARS TRIP THE LIGHT FANTASTIC TO MAKE THE NELSON "SHIMMY"

The ten hundred sailors who man the H.M.S. Nelson, pride of the British Navy, had a joyful time when the 33,000-ton warship stuck fast in the mud after leaving Portsmouth recently. The whole crew assembled on the after-deck of the \$38,000,000 vessel and danced in unison in the hope that concerted action might "shimmy" the Nelson off the mud but without success. Admiral Sir William Boyle tried the unique scheme of having a squadron of destroyers flash past his flagship at full speed to see if the wash would move her, but it took twelve hours of effort of seven destroyers and seven tugs and a welcome high tide to refloat her. The Nelson is now back in port to be examined by divers before leaving to lead more than a score of war ships on a cruise to the West Indies. Our picture (below) gives a good idea of the size of the Nelson, while (inset) twenty-five members of the crew stand side by side to show how puny they are in comparison with the turret which towers in the background.

Fertilizer For Light Lands

Waste Country In Northern Saskatchewan May Be Made Valuable

Light lands of northern Saskatchewan, millions of acres of which is now looked upon as waste country, may become of great agricultural and economic importance if experiments now being conducted by the Saskatchewan department of natural resources prove successful.

Peering into the future, Major John Barnett, deputy minister of natural resources, said: "In ten years we will look upon this barren country as valuable, agriculturally." A ton of fertilizer, shipped in by aeroplane to scattered points in the north, has brought encouraging results. In fact, such success was met that it is planned to extend and continue experiments this year.

Sweet clover caught on encouragingly in fertilizer-treated soil at Fishing Lakes, northeast of Prince Albert. The experiments, Major Barnett stated were prompted because of the successful growing of tobacco and other crops on fertilizer-treated lands in Norfolk county, Ontario. He pointed out the finest maritime potatoes have been grown on light lands, properly fertilized.

Improve Wheat Quality

French Ministry Of Agriculture Issues Striking Poster

Recently the Wheat Pool head office at Regina received a striking poster issued by the French ministry of agriculture as an appeal to the farmers of that country to concentrate on quality rather than quantity in producing wheat. The poster measures 31 by 41½ inches, and urges farmers to limit their wheat acreage; sow grades giving a satisfactory yield and rich in gluten; build up individual plots in co-operative elevators; and only place on the market well-cleaned and carefully graded wheat.

It also emphasizes feeding of wheat products to livestock, and has as its underlying idea the increase of wheat consumption in France. As increased consumption is one of the undertakings made by European importing countries which signed the London Wheat Agreement, this poster may be taken as an indication of France's campaign to implement the Agreement.

People In Glass Houses

Christian World Cannot Criticize Buddhists For Being Divid

Dr. Richard Roberts, writing in The New Outlook, says: "The religion of Japan is in the main, Buddhism, and in the east Buddhism is the most formidable rival of Christianity. Concerning Buddhism it is impossible to make general statements. That Buddhism is much divided within itself is not a defect at which Christians can point a finger. Let it be repeated with shame that there are in Japan today fifty-six separate Christian bodies trying to win it to their own kind of Christianity, and in the Conference of Federated Missions which I attended there were actually thirty-two constituent bodies. This appalling spectacle of Christian division in Japan today looks like the sin against the Holy Ghost."

Work On Peace Gardens

A state transient civilian camp, under the Civil Workers' association in the United States, will be established on the site of the international peace gardens at Turtle Mountain next spring, it was decided at the first annual meeting of the board of directors of the Peace Gardens' association, held in Brandon. Employment will be given to 500 men under federal instructions.

Scotland paid \$20 a head to destroy muskrats in the last year.

Production Of Grain

Must Always Be Made Activity Of Lands Of Western Canada

Restrictive measures on grain production should not apply where no alternative crop can be successfully grown, Dean A. M. Shaw, of the University of Saskatchewan, argued in an address on "Alternatives to Grain Growing in the Prairie Provinces," delivered at the agricultural societies' convention at Saskatoon. He pointed firstly to poultry and secondly to dual-purpose cattle as the possible channels of marketing grain to Saskatchewan conditions.

Production of grain, he said, must continue to be the main activity on the lands of western Canada. Turning to the possibility of marketing cereals products, he pointed out part of the area where the best wheat was grown was unsuitable due to lack of water and recurrent partial crop failures.

F. Warren, Bellefleur, F. Marshall, Yellow Grass, and others, urged investigation of a general belief among farmers that many recent deaths of horses and cattle were due to eating the straw damaged by grasshoppers.

First Canadian Farmer

Monument To His Memory Stands In Quebec City

The district around Quebec on both sides of the St. Lawrence river is one of the oldest settled parts of Canada. There is in Quebec city a monument erected to the memory of Louis Hebert, the first Canadian farmer. This monument stands in City Hall park, said to be once a part of his farm. The direct descendants of many of the original settlers who heeded their homes from the forest still occupy the ancestral acres today. The effect of dividing the farm amongst the sons of the family is seen in the long, narrow farm holdings, each fronting on the road. A system of mixed farming has come down from the days when a farm was practically a self-contained unit supplying not only food and shelter, but clothing, tools and other essentials.—Brandon Sun.

Information For Teachers

"Gems" from the examination papers of Hastings, Nebraska, school children are keeping school teachers smiling. In the papers the teachers "learned that George Westinghouse was the first President of the United States; that a squid is an Indian woman; that a grouse is a gruff old man; and that in preparing lettuce for the table one should wash off the 'yugs' worms and other livestock."

Old Subscribers

Names On Montreal Telephone Directory For 55 Years

At least six of the names that appeared in the Montreal phone book 55 years ago are still to be found in the directory of today, according to information picked up at the Bell Telephone Museum. Central knew all her subscribers by name in those days and nobody bothered about numbers.

In the early book of subscribers was the name of Sir Hugh Allan. Sir Hugh is dead, but that same telephone is still in "Ravenscrag." A few others listed then as now were John Douglass, Hugh Paton and Fred W. Evans. There was also the firm of Crathern and Caverhill and the George Caverhill still has a telephone.

The little book showed that John McArthur had this convenience when he headed the firm of John McArthur and Son. Today the phone is listed under the name of McArthur, Irwin, Ltd., but the McArthur's have had uninterrupted service for more than 50 years.

By September 18, 1883, there were 1,000 subscribers in Montreal and today there are 165,036, according to the latest count.

A Timely Warning

Better Radio Programs And Motion Pictures Are Wanted

Zit's Theatrical Newspaper says the motion pictures had better watch out, for advance photographs bordering on the threshold of immorality must stop—murders—rackets—thugs—and everything connected with the underworld should be lashed to stop destroying the brain of the younger generation.

Radio needs a lot of attention. They must prepare, and prepare quickly, for two talent to take the place of the present talent which will soon wear out. As it stands today the old timers are the hits and if it weren't for them where would radio be for stars on programs? I think at the end of nineteen hundred and thirty-four we are going to see a great change both in talent and radio, also in pictures.

Help For Blind Man

Mike Hambourg, sightless swimmer who competed in the Canadian National exhibition marathon swim yearly since its inception in an effort to obtain money for an operation on his eyes, is smiling. A Cleveland manufacturer is interested in his courageous battle for sight and is considering handing over the \$5,000 required.

CANADIAN SPEED STAR FOR NORWAY

Alex Hurd, famous Canadian speed skater, who finished second in the 1,500 metres, and third in the 500 metres race at the 1932 Olympic Winter Sports, has left for Oslo, Norway, to compete in several international events.

During The Past Forty Years Canada's Relative Increase In Population Greater Than U.S.

A Profitable Crop

Tobacco Growing Reaching Large Proportions In Canada

Although grown only in well-defined restricted areas of Canada, tobacco must now be regarded as a leading agricultural crop of the Dominion, particularly in the provinces of Ontario and Quebec and to a lesser extent in British Columbia. This fact may be illustrated by reference to capital investments in farms and factories, and the value of raw leaf and products of manufacture. In 1931 the farm value of the Canadian grown tobacco crop was estimated at over \$7,000,000, and the value of the various manufactured products was almost \$75,000,000. Canadian tobacco manufacturers had a capital investment of \$50,000,000. The investment in tobacco farms and equipment is approximately \$40,000,000.

During the years following the World War, Ontario rapidly became the leading province in tobacco production. For several years, until the close of the war, production was about equally divided between Ontario and Quebec. Changed consumer tastes from the cigar to the cigarette, and the simultaneous discovery of extensive soil areas in the Norfolk district of Ontario suitable for flue-cured tobacco, have been primary factors responsible for the increased development in Ontario.

The tobacco crop of 1932 was the largest in the history of Canada, being 54,093,730 pounds. It exceeded that of 1931 by nearly 3,000,000 pounds. This also was the first time since the war that two successive record-breaking crops were produced. These crops not only represented the greatest volume of farm production but also set a new high standard of quality. The quality of Canadian tobacco is now well recognized in the British Isles. For the first nine months of 1933 exports amounted to 12,928,375 pounds, an increase over the corresponding period of the previous year of nearly 4,000,000 pounds.

Corn Not Invaluable

Other Grains Just As Good For Poultry Feeding

There is no one grain that is indispensable in the feeding of poultry, though generally speaking, a ration in which there is a variety of grains will prove most satisfactory. Canada is a wheat-growing country and even in years of crop shortage there is available for feeding a surplus of wheat of the lower grades. Consequently the grain that should form the basis of poultry rations is wheat, and to this should be added oats, barley, or whatever other grains are available.

There is in Canada a belief that corn is essential in feeding poultry. Corn unquestionably is an excellent feed and in the feeding of poultry to use the common product as the basis of poultry rations. In Canada, however, corn is comparatively little grown and in some districts it is very difficult to procure and often at a price not justified when its value is compared with home grown grains. It has been demonstrated by feeding trials on the Experimental Farms that as good results can be obtained with rations containing no corn as with rations in which corn is used.

The Canadian grown grain most closely approximating corn in composition is barley, but as barley compared with corn is deficient in vitamin A, it is necessary to overcome this deficiency. This is best done by the use of alfalfa or clover, used fresh when available, or as alfalfa leaf meal or the leaves and blossoms of well cured hay. During the season of close confinement barley rations may be further fortified by the use of cod liver oil.

By all means use home grown grains. When it is necessary to purchase grains buy those of which Canada has a surplus as they will give as good results at lower cost than imported feeds.—F. C. Eford, Dominion Poultry Husbandman.

Definition Of "Serpent"

It seems an appropriate moment to recall the definition of "serpent" as it appeared in the original "Chambers' Dictionary" of 50 years ago, and still appears today. An enormous marine animal of serpentine form, frequently seen and described by credulous sailors, imaginative landmen, and common liars.

Government support and control of the domestic market in the Netherlands has resulted in better crop prices.

Hogs to the number of 2,680,955 were graded in Canada this year up to October 30, an increase on 1932 of 150,337 head.

Knitting needles with lights at the ends and batteries in the stem have been invented in Europe.

The Dominion bureau of statistics, in the following bulletin, undertakes to show that population growth in Canada has been more striking, by and large, than population growth in the United States.

"A comparison of population data for Canada and the United States reveals the startling fact that Canada has actually grown more rapidly than the United States. Canada has reliable population estimates dating from early in the seventeenth century while the continuous records for the United States date from the first census there in 1790.

"It is significant that only five of the fourteen decades for which we have comparable data disclose a higher rate of growth for the United States. These five decades constitute the period 1950-1900, before Western population in Canada had reached significant proportions.

"Since 1790 the population of the United States has increased 31 times, while that of Canada has increased almost 40 times. If we compared the growth over the past hundred years, despite the inclusion of the 1850-1900 period mentioned above, Canada still shows a slight advantage.

"During the past 40 years Canada's relative increase has been very pronounced, being some 20 per cent. greater than that of the United States.

"Again, from 1911 to 1931, Canada's density of population, excluding the Yukon and Northwest Territories, has increased by some 44 per cent. while that of the United States has increased by only 10 per cent.

"If the United States and Canada continue later present respective trends in growth, Canada's greater rapidity will be even more marked than it has been in the past. Indeed, if the United States continues its present trend, and Canada, unassisted by immigration, holds the natural increase at her present rate, the higher rate will be maintained."

These are arresting figures and they suggest that Canada is coming along steadily from a population standpoint. If we could just get the economic depression out of the way, the situation might be ripe for a substantial immigration movement into this country, making our growth more striking still.

Pink Grass On Range Land

Breakfast Happening Reported By Bow River Shepherds

Montreal can have its "brownish-colored" snow but a story of "pinkish grass" which dotted the range lands where sheep graze in the Bow river district was brought to Medicine Hat by herders who have been out since fall.

Following a heavy wet snow early in the fall, herders recall, there was a pinkish tinge to the grass when the range lands' white blanket disappeared. When touched, the grass crumbled in the hand.

Veteran sheepmen remember a similar occurrence in Montana many years ago. Scientists at that time attributed it to the snow clouds passing through volcanic atmosphere in Alaska.

In December, Montreal has a fall of volcanic ash, intermingled with snow. It gave the snow a brownish color.

May Be Old-Fashioned

But World Needs Idea Confucius Had For Training Children

It may seem old-fashioned to some, but it promises well for the future of Manchukuo that the Minister of Education has decided that the school system can do no better than follow the direction indicated by Confucius. "To teach them how to serve their parents," said the sage, to love their brothers, to respect their elders and to show sympathy to the poor, shall be the aim of essential courses in the curriculum.—Christian Science Monitor.

Canadian Characteristic

Perceval Roberts, director of the U.S. Steel and the Pennsylvania Railway Company, has for 33 years spent a summer vacation in Canada and on reaching Montreal en route for home he said when interviewed: "Why I almost feel like a Canadian." Asked as to the first symptom he recalled with emphasis, "Good common sense." Joanny Camuck certainly takes a great deal after the head of the family in this respect.

Although first in value of gross production in 1930 per year ago, Canadian vegetable products ranked fourth only in the number of people employed and salaries and wages paid.

"Is your commercial school for girls a great success?" "Yes, 50 per cent of the pupils have married their employers."

LACOMBE PRESBYTERIAL

Mrs. R. Colwill, Edmonton, delegate to the Dominion Board in 1933 the speaker of the evening, at the Lacombe Presbyterian meeting held in the United Church, Ponoka, on February 6th, gave an interesting account of the work of the Board, the resolutions and recommendations passed, and the inspiration derived from the study of both the practical and spiritual conditions involved in missionary efforts. The Kingdom of God Movement, or Creative Love in Action, provides a key-note for daily living and with this thought as a foundation, the Board had thoroughly studied all phases of mission work, economic conditions, temperance and social evils. Approximately 60 delegates and members representing Wetaskiwin, Ponoka, Bentley, Eclipse, Hobbema, Lacombe, Morningside, Spring Valley, Glive, Fairview, attended this, the ninth annual meeting of the Lacombe Presbyterian, and the reports received from each Auxiliary were most encouraging. 9 Auxiliaries, 4 Associated Societies and 1 evening Auxiliary, make up a membership of 153, an increase of 13 over the previous year. Subscriptions to 77 Missionary Monthlies and 70 World Friend were reported. The allocation of \$1200.00 was not reached, a total of \$1060.00 having been sent the Branch Treasurer. Three new Baby Bands had been organized in 1933. The supply allocation had been fully met.

A splendid paper on Temperance, with particular reference to drugs, was read by Mrs. C. T. Coote, of Glive. An examination conducted by Mrs. W. C. Sweet of the Hobbema Mission Band, brought out the wonderful knowledge of Alberta Mission work, which has been gained by these children. This band has won the banner for proficiency for the last three years, under the leadership of Mrs. W. R. Cantelon. The Lacombe Band had made a layette for one of the hospital.

An informative Round Table discussion was led by Mrs. Colwill, which cleared up some vague points in connection with the work. Mrs. T. C. Trimble, of Ponoka, was appointed delegate to the Branch Conference which is to be held in Edmonton on March 6 to 9th. An allocation of \$1100.00 was accepted for 1934.

A delightful solo by Mrs. Matheson of Ponoka was much enjoyed.

Following a delicious banquet served by the Ponoka Auxiliary, Mrs. G. Murdock welcomed the gathering and Mrs. East of Wetaskiwin, replied, also extending an invitation to the Presbyterian to meet there next year. Rev. W. B. Leard of Glive brought greetings from Presbytery, and Rev. W. R. Cantelon of Hobbema gave an enlightening short talk on Indian work. Rev. T. R. Davies conducted the devotionals for the evening service, and following Mrs. Colwill's address the Presbyterian officers were installed by Rev. R. B. Layton as follows:

Pres. Mrs. P. A. Rainforth, Glive; Vice Presidents, Mrs. E. L. Misenor, Lacombe; Mrs. C. T. Coote, Glive; Mrs. J. C. McLennan, Bentley, and Mrs. Arnold, Battle River, Rec. Secy., Mrs. C. E. Todd, Lacombe; Corres. Secy., Mrs. R. B. Layton, Lacombe; Treas., Mrs. W. C. Sweet, Lacombe; Christian Stewardship and Finance, Mrs. W. M. Mellett, Wetaskiwin; Evening Aux., Mrs. A. Gilmour; C.G.I.T.'s, Mrs. A. Aldwinckle, Lacombe; Mission Bands, Mrs. W. R. Cantelon, Hobbema; Baby Bands, Mrs. E. Ogilvie, Fairview; Assoc. Helpers, Mrs. R. Hainworth, Spring Valley; Supplies, Mrs. D. A. Colpitts, Wetaskiwin; Strangers, Mrs. A. Fowler, Ponoka; Literature, Mrs. T. R. Davies, Ponoka; Library, Mrs. J. Laycock, Ponoka; Miss. Monthly, Mrs. C. Danner, Lacombe; Temperance, Mrs. Millin, Wetaskiwin; Pres., Mrs. C. E. Todd, Lacombe.

ASKS FOR PROBE

OF PHONE DEPT.

Edmonton, Feb. 9.—Alleging what he declares to be "an alarming situation which has contributed immeasurably to the impairment of the credit of the province," D. M. Duggan, Conservative leader, is demanding a thorough inquiry into all phases of the Alberta Government Telephone system by the railways and telephone committees of the house, in a notice of motion tabled Friday.

Drawing attention to the report of J. C. Thompson, provincial auditor, in the public accounts, on the status of the telephone system, which he says discloses the alarming situation, Mr. Duggan declares it is imperative that immediate action be taken to permit satisfactory service without further losses.

The Thompson report showed that telephone operation for the year ending March 31, 1933, resulted in a loss of \$277,066, and if depreciation had been provided for on the previous basis this would have been increased by an additional \$831,361.

"Due to the insufficiency of the existing depreciation reserve, loss arising from removal of dead lines, aggregating \$617,790, was capitalized as distinct from the practice in previous years of writing off all capital losses in connection with plant

replacement or removal to depreciation and renewal reserve," states the report.

"Through failure to earn sufficient sums for depreciation over a period of years, the utility faces a heavy capital loss on its investment in plants and equipment."

Pointing out that the existing situation is satisfactory, the auditor suggests that an engineering inventory could be made by telephone officials. No complete inventory has been made since the Wray appraisal in 1918, and the balance sheet shows various items at cost.

Our shop is kept spotless. Along the road to weldland; we're selling meat that's simply grand. And housewives now know where to go, to buy the meats that please them so. "Service Is Our Motto"
